

# LET THE MASTER DO IT!™

Assembled entirely on a frame-like portable device made of light aluminum and stainless steel, the Kabobmaster™ Grill is a super-size professional-grade outdoor powered rotisserie grill intended for the serious kabob lover.

It is adaptable as an attachment and placed over the existing rectangular fireboxes of outdoor charcoal grills.

The round stainless steel cross bars and rectangular shape allow it to be placed and attached to the grill support panels of a firebox or charcoal tray.

*The 110V rotisserie motor turns all 10 skewers simultaneously at approximately 3 RPM, assuring an even consistent burn while retaining the delicious natural flavor and juices of the food.*

Convenient, easy to use and very versatile, the Kabobmaster™ Grill is the easiest way to grill a variety of kabobs. You can cook just about anything on it. Its uses are limited only by your imagination!
